STOMOCUR®

Product Guide 2024
Stomacare

Introduction

FORLIFE has stood for high-quality products for over 30 years, enabling economic activities for medical retailers, clinics and pharmacies while maintaining the highest quality standards – Made in Germany.

We have deliberately chosen to conduct research, development and production exclusively in Germany. As well as trusting in the extensive experience of our employees, the location in Germany is also part of our corporate philosophy. We are delighted that we have successfully brought together long-standing FORLIFE employees with younger talents, combining proven technologies with innovation.

Progress is an elementary component of our corporate success. In addition to the expertise of our employees, we rely on state-of-the-art production machinery. The use of cutting-edge technologies and efficient production methods ensure the long-term economic production of high-quality and innovative products in Germany.

Our goal is to provide ideal care for the stoma, allowing ostomates to get on with their lives in comfort and security. This is the objective of our products and our daily work.

Your FORLIFE Team

Always well taken care of with STOMOCUR®

Our STOMOCUR® pouches are manufactured in Germany and characterized by our innovative and unique features. We use skin protection materials made from natural ingredients that promote skin health and reduce irritation and inflammation.

Our pouches are comfortable and secure to wear and provide confidence and comfort for the user. Ultimately ensuring healthy skin around the stoma.

All our products are made from a very soft, quick-drying non-woven fabric. Our pouches contain Polyethylene (PE), which does not stick to clothing and is gentle on the skin to avoid skin reactions. Our skin protection materials are composed of natural ingredients that both promote skin health and reduce irritation and inflammation.

Many of our pouches are equipped with a 'Window', allowing patients and medical professionals to observe the stoma without removing the pouch.

To meet individual needs, STOMOCUR® pouches are available as a one-piece system, where the baseplate is connected to the pouch and as a two-piece 'Clic' system, where the pouch can be removed and replaced without replacing the baseplate.

Our Colostomy 'Select' range has a pouch shape resembling a symmetrical figure-of-eight. This shape fits on either side of the body and is designed for maximum capacity with minimum bulk, allowing the product to be worn for longer without being noticeable under clothing.

The unique activated carbon filter is an integral part of all our colostomy pouches, ensuring odour-free use for the user.

Our Ileostomy drainable pouches, 'Protect', are equipped with our patented MPC filter technology (Moisture Protect Composition) - an additional protective layer that prevents liquid absorption, keeps the user odour-free and allows unwanted gases to escape.

All drainable pouches feature our unique, easy-to-use 'Safe and Easy' outlet.
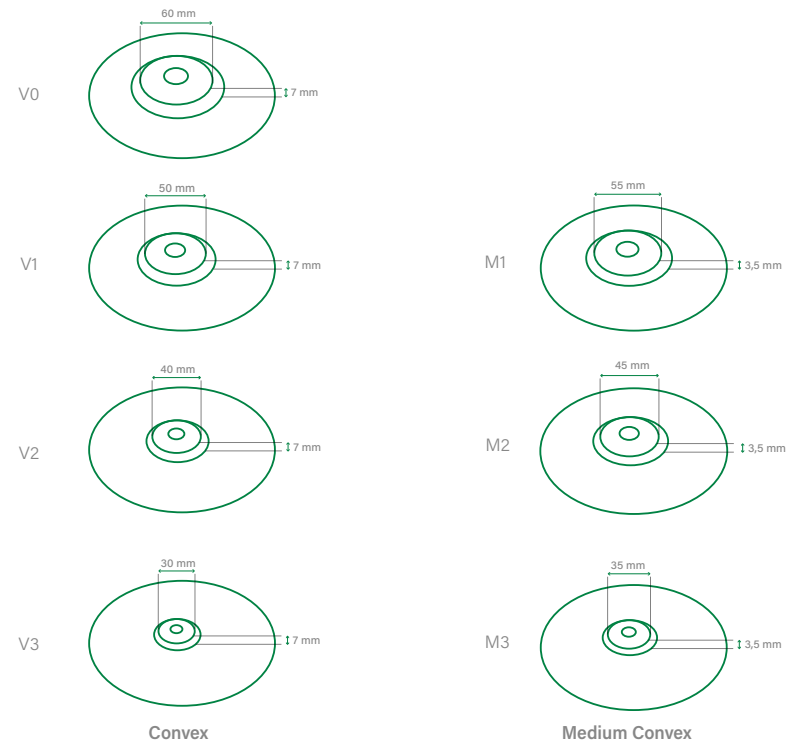

Our Urostomy pouches are available with soft bung closure, the 'Safe' range, as well as our tap closure, 'Twist & Safe' both providing choice, comfort and confidence. Night drain adapters are included with all urostomy pouches and 'Twist & Safe' pouches also come with a drip cap to prevent leaks.

Further details on the respective product ranges can be found on the following pages of our STOMOCUR® product guide.

Convex care

For ultimate safety and comfort, we offer a range of convex care supplies. STOMOCUR® offers a total of four different convexities in two different heights. This range of plateau sizes gives the user maximum choice.

V0	60 mm / 7 mm
V1	50 mm / 7 mm
V2	40 mm / 7 mm
V3	30 mm / 7 mm

HYDROKOLLOID

COMBIFLANGE

Hydrocolloid and Combiflange

FORLIFE's Hydrocolloid is a flexible, hypoallergenic, and skin-friendly skin protection, ideal for stoma care.

How does Hydrocolloid work?

Hydrocolloid adheres to the skin through the absorption of heat and moisture. This moisture absorption causes the baseplate to swell slightly, ensuring good adhesion to the skin and preventing leaks and skin irritation.

Features:

- Hypoallergenic skin protection
- Good skin compatibility
- Comfortable hold due to maximum flexibility
- Easy application

Combiflange:

Baseplates with Combiflange hydrocolloid are made up of two interconnected hydrocolloid layers that are thicker on the inside, directly on the stoma, and become thinner towards the outside. This double layer ensures a quick and secure hold that lasts longer and has a high absorption capacity. The Combiflange skin protection is available in a variety of our convex STOMOCUR® products, flat urostomy and drainage pouches as well as two-piece convex and flat baseplates.

Soft and flexible

Konvex®

Our convex ostomy pouches are the flexible choice for maximum security and additional confidence. They adapt to the contours of your body, ensuring more comfort during wear. Combiflange hydrocolloid and alginate options are available in our Konvex range.

Features:

- 7 mm convexity
- Maintains its convex shape during wear
- Easy-to-use 'Safe and Easy' outlet for drainable pouches
- Comprehensive range of cut-to-fit or pre-cut sizes
- High adhesion for advanced performance
- Skin-friendly, hypoallergenic skin protection
- Efficient odour elimination through the integrated filter system
- Four convexities
- Integrated belt attachment

FORLIFE BERLIN

alginat

Bioactive skin healing

Our alginate baseplate is one of our top skin protection products, offering both preventive and healing properties. Available in a variety of sizes for both drainable and closed pouches. Alginate has been used in woundcare for many years.

Features:

- Healing
- Absorbent
- Antibacterial
- Haemostatic
- Used without any accessories to cost-effectively treat problematic skin

How does Alginate work?

We exclusively use natural alginate found in brown seaweed, which can absorb up to 20 times its weight in liquid. The alginate in our skin protection absorbs moisture from the skin, making it ideal for healing damaged skin and keeping it healthy.

Applications for use are:

- Skin prone to allergies
- Sore, excoriated peri-stomal skin
- Moist bleeding, peri-stomal skin
- Ulcerated peri-stomal skin
- Muco-cutaneous separation
- Stomas which produce excessive mucous
- Infected peri-stomal suture sites
- Alginate adhesive can readily be used on non-problematic skin to prevent complications occurring

FORLIFE Alginate skin protection contains not just a trace element but 15% Alginate, this is significant enough to promote healing.

clicsystem

For those who prefer a two-piece ostomy pouch system, we offer our popular Clic System for closed, drainable and drainage pouches, as well as for urostomy care.

With three different ring sizes (45 mm, 57 mm or 70 mm) and with flat or convex baseplates, the Clic System is flexible and adapts to various needs. Combiflange hydrocolloid and alginate are available as skin protection.

Features:

- Versatile, flexible and easy-to-connect system
- Unique spacing between the ring and the baseplate allows the user to attach the baseplate without applying pressure
- Provides a simple, stable connection between the baseplate and pouch
- Audible 'click' when attaching the pouch confirms that it has been attached securely for safety against leaks
- Soft non-woven cover for additional comfort
- Wide range of pouches for both types of baseplates

SOFT BUNG

TAP

DRIP CAP

Our extensive urostomy range is designed for maximum capacity with minimal bulk. The unique anti-twist pouch shape makes emptying easier. Available with soft bung or tap closure for increased safety and convenience, baseplates include flat and convex skin protection.

In addition to our Combiflange hydrocolloid skin protection, our urostomy portfolio includes Microskin baseplates with a semi-permeable adhesive surface. This ultra-thin, elastic and breathable product easily conforms to body contours and folds, significantly reducing the risk of leakage. Microskin is breathable and water vapor-permeable for healthier skin, providing the user ultimate freedom of movement.

Available:

- Three different skin protection options: Combiflange, Microskin, gelatine-free
- Available in flat and convex
- As one-piece and two-piece systems

Our urostomy pouches have the following features:

- Optional 'Safe' soft bung or 'Twist and Safe' tap closure
- Drip cap for 'Twist and Safe' outlet
- Anti-twist shape
- Easy connection to night time drainage systems
- Integral valve to prevent urine backflow
- 'Window' technology for easy positioning
- Soft non-woven cover - quiet, non-cling, comfortable
- Also available with a transparent pouch back

gelatine**frei**

For ostomy patients who do not use products with gelatine
or other animal-based ingredients, we offer our pouch
assortment with gelatine-free skin protection. By using natural,
plant-based ingredients, these pouches are equally
skin-friendly and do not compromise on comfort and safety.

The skin protection used is made of hypoallergenic hydrocolloid without
gelatine and is available in our one-piece closed Select colostomy
pouches, one-piece drainable Protect ileostomy pouches and Safe
urostomy pouches.

Features:

- Thin and flexible
- Particularly gentle on the skin
- Strong adhesive

gelatinefrei

gentle to skin

Soft and discreet closure

STOMOCUR® Safe gelatinefrei transparent - Flat urostomy pouches
with gelatine-free skin protection can be found on page 36.

Gelatine Free

®

SPECIAL SUPPLY

Our comprehensive range of products for specialised care has been developed for medical professionals and includes various types of drainage pouches as well as pouches for paediatric care.

Paediatric Care:

- Two options for premature babies up to 900 g and infants up to 5000 g
- Gentle and skin-friendly hydrocolloid
- Soft non-woven cover on one side, transparent back for easy observation
- Closed pouch can be cut open and used as a drainable pouch with a clip or an adhesive tape

Drainage Pouches:

- Large, flexible skin protection plates combined with flexible, transparent pouches – ideal for promoting healing with easy observation
- High-output drainage ports with soft outlet
- Integrated access openings allow easy access to the wound without removing the pouch
- A range of shapes and sizes to meet the patients' needs

Drainage Protect Pouch:

- Available in flat, convex and medium convex options
- Soft non-woven cover with a window for easy positioning and observation
- MPC filter for odour control
- High output drain with bung closure
- Hypoallergenic hydrocolloid as skin protection
